To: The Eurocodes National Correspondents

Subject : Collection of information for structures designed to EN Eurocodes

Dear Sir / Madam,

As the full implementation of the Eurocodes in the Member States progresses, JRC now also concentrates more on collecting feedback on practical experience using the Eurocodes along with its continuing efforts for supporting implementation, harmonization and further development of the Eurocodes.

The collection and evaluation of these materials will serve for the activities related to the facilitation of practical implementation and use of the Eurocodes. A workshop on European level in collaboration with (national) Technical Associations and Chambers to 'share' experiences on structural design using the Eurocodes is foreseen to be organized within 2013.

In this context, JRC seeks for opportunity to get in touch with all interested parties (National Authorities, National Standardization Bodies, Eurocodes National Correspondents, Eurocodes end-users, etc.) as well as CEN TC250 Subcommittees and Horizontal Groups to collect feedback on practical use of Eurocodes.

Please kindly **inform** us about the "state-of-the-art" **examples of structures designed to EN Eurocodes** by filling in the attached form.

JRC also appreciates if you could circulate this form to your relevant contact points.

After collecting and compiling the examples, JRC will publish the selected examples of the structures on the official Eurocodes website (<http://eurocodes.jrc.ec.europa.eu/showpage.php?id=34>).

Please send us back the attached form and related documents to eurocodes@jrc.ec.europa.eu or to the fax number below.

Thank you for your collaboration.

With best regards,

Artur Pinto
Head of Unit
JRC, IPSC, ELSA

- 1- Form for structures designed to EN Eurocodes

Please fill-in this form with information on structures designed with the Eurocodes and return it to eurocodes@jrc.ec.europa.eu. Please also provide electronic files or pictures¹ of the structure, appropriate for publication in the website. This information will appear in Eurocodes – Building the Future, the European Commission website on the Eurocodes: <http://eurocodes.jrc.ec.europa.eu>.

¹ JRC respects the intellectual property of others and explicitly assumes that the photos and/or the images that will be sent as attachments to this document are the property of the user undersigned or s/he is the person authorized to act on behalf of the owner of these photos/images. By signing this document, the person undersigned gives permission to JRC to publish these materials on the Eurocodes website. If the aforementioned materials belong to other third parties, JRC accepts no responsibility for publishing them on its website.

INFORMATION ON THE STRUCTURE

Name of structure	
Location	
Date of completion	
Type of structure	
Owner	
Designer	
Main geometric data	
Awards	
Website (structure)	
Website (designer, constructor)	
<p>Please use the space below to provide a short description of the structure, indicating the project of which the structure is part, Eurocodes and National Standards used in the design, and other information you consider important (attach an extra sheet if necessary).</p>
