

Ispra, 11 April 2012

To: The Eurocodes National Correspondents

Subject: Collection of Eurocodes guidance material

Dear Sir / Madam,

As we have already communicated on 15 February 2012, JRC now concentrates more on collecting information and material related to the practical implementation and use of the Eurocodes, along with its continuing efforts for supporting implementation, harmonization and further development of the Eurocodes.

In addition to "state-of-the-art" examples of structures designed to EN Eurocodes, we kindly ask you to **inform** us about **Eurocodes related guidance material** (publications, books, designer's guides, manuals, worked examples, etc.) that has been published in your country. Your input will reinforce the request by DG ENTR concerning the collection of information on documents and activities related to the Eurocodes (communication sent to ENC group by Manfred Fuchs on 02 March 2012).

Information for the Eurocodes guidance material will be published on the official Eurocodes website (<http://eurocodes.jrc.ec.europa.eu/showpage.php?id=34>) facilitating the exchange of information between designers and engineers in the different countries. A concise but comprehensive classification scheme (type of guidance material, country, Eurocode part, etc.) will be used so as to facilitate the extraction of the information.

Please send us back the attached form and related documents to eurocodes@jrc.ec.europa.eu or to the fax number below. JRC also appreciates if you could circulate this form to your relevant contact points in your country.

Thank you for your kind collaboration.

With best regards,

Artur Pinto
Head of Unit
JRC, IPSC, ELSA

Attachments:

- 1- Form for information on Eurocodes related guidance material

Please fill-in this form with information Eurocodes related guidance material (publications, books, designer's guides, manuals, worked examples, etc.) and return it to eurocodes@jrc.ec.europa.eu.
